

Cianna Foster

6/19/13

Dear possible customers,

Farming isn't easy. A lot of things go into it. Especially the type that I do. I don't use all those pesticides and other chemicals that big factories do. All those products could potentially harm you. Those can get you sick. Instead of going the easy way out with the products that big companies use, I do all the work. I pull out weeds and kill the bugs that could harm the plants myself. I put all my heart and soul into making the best fruits and vegetables. Those are the reasons you should buy from me. My plants won't harm you.

Sincerely,  
your neighborhood  
farmer
